QR CODES

What's a QR Code?

- A QR Code (stands for "Quick Response") is a mobile phone readable bar code that can store website URL's, plain text, phone numbers, email addresses and pretty much any other alphanumeric data.
- One can scan the QR code instead of typing in a tedious website address.

How do I use it?

Simply download a QR scanner (free on your mobile device) and scan the QR code. Your website will pop up in an instant! It is similar to taking a picture of the code.

Use the QR code to access our websites or articles, videos and other media.
